## SUMMARY

---

An enthusiastic 23-year-old frontend developer who loves creating visually appealing and smooth user experiences, I'm passionate about using modern technologies to build user-friendly websites and apps. I excel in teamwork and communication, leveraging my professional experience to deliver high-quality results

## SKILLS

---

Programming Languages:	HTML, CSS, JavaScript, TypeScript
Libraries and Frameworks:	React.js, Next.js, Node.js, Redux Toolkit, React Query, React Hook Form, Axios, Material UI, Tailwind CSS, Shadcn UI, Bootstrap, and other several NPM packages
Development Tools:	Git, Visual Studio Code, Prettier, NPM, PNPM, YARN, Chrome Dev Tools
Personal Attributes:	Problem-Solver, Team Player, Adaptable, Detail-Oriented

## EXPERIENCE

---

### Frontend Developer

January 2024 - September 2024

ShopDoora Co., Ltd 📍 Yangon, Myanmar

- Contributed to the development of **e-commerce, subscription-based content platforms** and **SaaS projects** using React.js and Next.js, writing reusable, modular, and maintainable code.
- Worked closely with project managers and stakeholders to understand project requirements and timelines.
- Collaborated closely with UI/UX designers to translate designs into visually appealing, interactive applications.

- Ensured the performance and responsiveness of applications across various devices and browsers.
- Gained proficiency in synchronous and asynchronous state management, essential for building complex applications.
- Optimized frontend-backend sync by **50%** through seamless API integration with backend developers.
- Partnered with QA engineers to resolve issues efficiently, ensuring high-quality deliverables within tight deadlines.
- Experienced in working with microfrontend architecture, solving module-linking challenges.

## EDUCATION

---

### Bachelor of Computer Science

*December 2019 – March 2020*

University of Computer Studies 📍 Pakokku, Myanmar

- Acquired foundational knowledge in Computer Science.
- Led two group projects, delegating tasks to ensure each team member contributed effectively to achieve optimal results.

### Special Web Design

*February 2023 - March 2024*

MMS One Stop IT Solutions 📍 Yangon, Myanmar

- Developed expertise in frontend web development by creating interactive web applications.
- Mastered both synchronous and asynchronous state management techniques using Redux Toolkit.

## PERSONAL PROJECTS

---

- **[Feels](#)**: An online platform where users can share their emotions anonymously along with a maximum of three YouTube videos. It also has the ability to generate images for each incoming message along with your replies.
- **[MovieDB Search](#)**: An online platform that you can use to explore movies, tv shows, and people. It also provides an add-to-watchlist feature to keep track of movies and tv shows they want to see without having to rely on memory or external lists.
- **[Todo App](#)**: A user-friendly web app that is designed to help individuals organize their daily responsibilities, goals, and tasks efficiently. This application offers a convenient and organized way to manage your to-do items.
- **[React Data Query](#)**: A small client side asynchronous remote state management library, which automatically manages cache based on the provided configurations.
